

## What vendors offer SAP-Primavera integration?

Contributed by Administrator

Since Primavera entered the market with its own product, you can't find all of them listed at their home page anymore. The 'usual suspects' are Pipeline (formerly Intech), SAOLogix (formerly LaborLogix), Impress, a number of smaller companies that had built one-off solutions, and some EAI vendors that claim to be able to "link everything". TCR used to offer a solution but it is unclear whether they still are on the market. Rumors have it that Impress is about to leave the market. For a listing of all solutions please click on the "links" menu button. You can find a more detailed analysis of integration options in the SAP-Primavera section of this web site.
